

Energy Policy

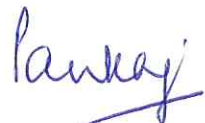

PKC Group is committed to protecting and enhancing the environment to contribute to the sustainable management of the global environment. Our aim is for continual improvement in energy performance and energy management system which where possible to prevent energy usage at source, taking into consideration business objectives, employees, the local community and continual improvement of energy management system at all of sites globally. We will comply with all applicable legal and other requirements which relate to energy aspects and so far, as practicable, accepted best practise in energy management.

In the field of energy management, we aim to go further and lead by example, pioneering new techniques and technologies whenever is possible. Our low carbon vision, targets and plans to achieve these, contained in the energy and carbon management plan for all PKC Group facilities.

We also commit to:

- Increase energy efficiency at all our facilities.
- Reduce our energy consumption through a formal programme of energy and carbon saving measures.
- Review our energy performance regularly and seek continual improvement.
- Review our energy objectives and targets annually and publish targets against which performance can be measured.
- Make available adequate resources and information to achieve our energy objectives.
- Share our policy and commitment to energy reduction with our stakeholders.
- Encourage energy efficiency and good energy and carbon management in our supply chain.
- Implement energy improvement projects identified within the energy management systems.
- Provide regular management reports on energy performance.
- Operate our energy management systems in accordance with ISO standard 50001.
- Support the purchase of energy-efficient products and services and design for energy improvements.
- Communicate this policy to all our staff, ensure they understand the energy impacts of their job and how to minimise these.
